DREAMWATER TECHNOLOGY

MICHAEL A. FERRARIS

ESTABLISHED JUNE 2004

DREAMWATER TECHNOLOGY with a minimal capital and a vast experience in Swimming Pool Construction. Formed a team of Masons and Laborers primarily to build Pool from small scale residential use to commercial and high rise.

Over the years, we have been recognized in Swimming pool industry to an Innovation-role by developing logic controls, solar technology applications meant to promote an energy efficient systems and conservation of life's resources. Furthermore, the company dedicates a diversified ability to different types of water innovations creating fun and leisure and efficient enhancement of life and the conservation of its natural capitals. Today, Water is vital use towards requirements and aesthetic functions, vent and cooling system which provides natural air scheme for a structure and also serves as odor control in an environmental friendly way. This trade provides alternative solutions in Global Changes. Dreamwater Technology gives life to WATER.

LOOKING BEHIND

Dreamwater Technology in late 2004 had its humble beginnings in the swimming pool industry first in residential dwellings. Its name was created for a distinct innovation on the industry from a complementary work to an innovative drive.

This adversity for improvement, The Company first introduce the energy efficient systems wherein effort shall come into earth friendly compliance. In response to actions the company introduce the LED Type underwater lights, a low electricity consumption of which it imports resources from Japan and Australia as early as year 2006. In the rampage exploration for competence the company focus on using automated technology in lieu to safety of pool users. Our Team has installed automated units for swimming pool all throughout the country.

As we have gone further the company had engaged its services to water treatment. It is essential for some places in the country that has not yet supplied by local water distributor. The company developed systems using the deep and shallow well supply in year 2007. Installation of automated backwash sand filters import from china and combined with water softener systems from USA, this is a breakthrough as the water was tested it has passed the potable water standards.

OUR VISION

For over 16 years, commitment to our Core Values has made Dreamwater Technology the ideal building partner for the region's most forward-thinking organizations.

Our success comes from a steadfast commitment to the client's vision and a culture of balance, integrity, leadership and loyalty.

At Dreamwater, we transform the construction experience through creation of an environment that fosters collaboration and project team engagement.

With a workplace that attracts and retains the best employees in every field.

We are proud of the dedication, skill, and integrity of each of our employees, and their unique contributions in building our high-performance company.
